## Engineer

### Description

We are looking for an experienced petroleum engineer to monitor oil and gas extraction and ensure all operations run smoothly. You'll design and schedule drilling activities both offshore and onshore. You'll analyze geological data and present results to customers. Your petroleum engineering duties will also include researching new methods of extracting oil and gas and discovering new reservoirs. To complete these tasks successfully, it's important to have experience with computer-aided software and great mathematical skills. You should also be able to work effectively as part of a team, as you'll collaborate with other engineers and scientists. If you're analytical, detail-oriented and available to travel to different locations on a regular basis, we'd like to meet you.

### Responsibilities

Responsibilities

- Develop plans for oil and gas extraction
- Use and maintain drilling and fracturing equipment
- Supervise drillings and extractions
- Research new ways and new sites for oil and gas extraction
- Analyze formation of rocks and reservoirs
- Use computer-aided models to enable drilling
- Determine budget and requirements of projects
- Supervise and train technical staff
